Ambient Air Monitoring

Course # 222

This one-day course covers the basic design and theory of ambient air monitoring, including the State Implementation Plan Process, quality assurance and control methods as they relate to monitoring instruments, site development criteria and data processing. This course will address PM 2.5 and other particulate methods, ozone, oxides of nitrogen, carbon monoxide, hydrocarbon, sulfur dioxide, meteorology systems, data recording systems, gas calibration systems, and zero air systems.

NEW

This course is also being webcasted. If you are interested in taking the course via the internet, use the following URL link to participate in the class:
